

William Butz is an experienced economic demographer, survey director, statistical system administrator, science policy and non-profit administrator, and policy advisor. Now retired from full-time employment, he was from April 2011 to October 2013 a Senior Research Scientist with the World Population (POP) Program at the International Institute for Applied Systems Analysis (IIASA) in Austria and Director of Coordination and Outreach at the Wittgenstein Centre for Population and Global Human Capital (a collaboration between IIASA, the Austrian Academy of Sciences and the WU-Vienna University of Economics and Business), where he helped direct research applying tools of demography to challenges of human capital formation around the world. Previously, he was President/CEO of the Population Reference Bureau in Washington (2003-2011), Senior Economist at the RAND Corporation (2002-2003, 1970-1983), Senior Resident Consultant at the Futures Group (2002), Division Director for Social and Economic Sciences at the National Science Foundation (1995-2001), and Associate Director for Demographic Programs at the U.S. Census Bureau (1983-1995). His undergraduate and graduate studies at Indiana University and the University of Chicago were in economics. His own research, published in more than 50 peer-reviewed articles, monographs and book chapters, has focused on economic and demographic aspects of poverty, fertility, mortality, nutrition, education, and scientific manpower in developing countries, the U.S. and Europe. He directed survey projects in Guatemala and Malaysia, was a member of the Board of Reviewing Editors of *Science* magazine from 2002 to 2013, and is a fellow of the American Statistical Association and the American Association for the Advancement of Science.
